LABORATORY MANAGEMENT	1985 Index to Subjects
<p><b>A</b></p> <p>abetalipoproteinemia; associated with vitamin E malabsorption; June, 63</p> <p>acetylcholinesterase; as a marker of fetal neural-tube defects; Sept., 24</p> <p>acquired immune deficiency syndrome (AIDS); human T-cell lymphotropic type III virus as agent of; May, 32</p> <p>albumin; in cerebrospinal fluid; as indicator of multiple sclerosis; Oct., 39</p> <p>alcohol; ethyl; breath testing for; June, 21; as an intoxicant during driving; April, 15; June, 21</p> <p>alkaline phosphatase; sources of increased activity; May, 55</p> <p>allergy; atopic; laboratory testing for; July, 19</p> <p>alpha-fetoprotein; as a marker of fetal neural defects; Sept., 23</p> <p>alpha-tocopherol (vitamin E); deficiency of; tests for; June, 57</p> <p>amphetamine; illegal use in athletics; Aug., 54</p> <p>anencephaly; alpha-fetoprotein as a marker of; Sept., 23</p> <p>antibodies; AE1 and AE3; in histologic diagnosis of cancer; May, 39</p> <p>IgG4; in testing for atopic allergy; July, 19</p> <p>monoclonal; in histologic diagnosis of cancer; May, 38</p> <p>monoclonal; in immunochemical identification of hormone receptors in breast and endometrial cancer; July, 43</p> <p>antibody; monoclonal anti-IgG4; in testing for atopic allergy; July, 20</p> <p>T29/33; in immunohistologic recognition of cancer; May, 43</p> <p>antigen; carcinoembryonic; as a marker of colorectal carcinoma; Nov., 27</p> <p>apolipoprotein B; in metabolism of vitamin E; June, 63</p> <p>arabinitol; as a marker of <i>Candida</i> infection; March, 59</p> <p>aspergillosis; diagnostic tests for; March, 53</p> <p><i>Aspergillus fumigatus</i>; antigens of; in diagnostic testing for; March, 54</p> <p><i>Aspiration Biopsy: Cytologic Interpretation and Histologic Bases</i> (Koss, Wolke, and Olszewski); (Book review); Dec., 45</p> <p>aspirin; as inhibitor of prostaglandin and thromboxane formation; Sept., 47</p>	<p>assay; bovine conglutinin; for circulating immune complexes; Dec., 38</p> <p>complement fixation (CF); for blastomycosis; coccidioidomycosis, and histoplasmosis; March, 46</p> <p>cryoglobulin; for circulating immune complexes; Dec., 38</p> <p>enzyme-linked immuno-; for antigens of <i>Candida albicans</i>; March, 54</p> <p>enzyme-linked immunosorbent; biotin-avidin amplified; for herpes simplex viruses; June, 54</p> <p>enzyme-multiplied immuno- (EMIT); for drugs used illegitimately in athletics; Aug., 56</p> <p>fluorometric; for protoporphyrin; in diagnosis of iron depletion; July, 55</p> <p>high-performance liquid chromatographic (HPLC); for cyclosporine; Jan., 32; for estrogen and progestin receptors in breast and endometrial cancer; July, 44</p> <p>latex agglutination; for <i>Cryptococcus neoformans</i>; March, 36</p> <p>multipoint titration; for estrogen receptors in breast cancer; July, 40</p> <p>radioallergosorbent/enzyme-linked (RAST/ELISA); for IgG4 antibody; in allergy testing; July, 21</p> <p>radioimmuno-; for creatine kinase-MB; Jan., 46; for herpes virus types I and II, as compared to enzyme immunoassays; June, 54; for myelin basic protein in multiple sclerosis; Oct., 38</p> <p>Raji cell; for circulating immune complexes; Dec., 38</p> <p>sucrose-gradient centrifugation; for estrogen and progestin receptors in breast and endometrial cancer, July, 40</p> <p>assays, complement-related; for circulating immune complexes; Dec., 36</p> <p>DNA probe; in microbiology; April, 21</p> <p>for drugs used illegitimately in athletics; Aug., 56</p> <p>immuno-; for alpha-fetoprotein as a marker of fetal neural-tube defects; Sept., 29; for phenytoin; Sept., 50</p> <p>immunochemical; for creatine kinase-MB; Jan., 48</p> <p>immunodiffusion; for <i>Coccidioides im-</i></p> <p><i>itis, Blastomyces dermatitidis, and Histoplasma capsulatum</i>; March, 46</p> <p>latex agglutination; for histoplasmosis, coccidioidomycosis, and blastomycosis; March, 49</p> <p>photometric; for phenytoin; Sept., 50</p> <p>audiovisual equipment; for laboratory teleconferencing; May, 69</p> <p>automation; in blood grouping and typing; Nov., 43</p> <p><b>B</b></p> <p>basement-membrane antigens; in immunohistologic recognition of cancer; May, 46</p> <p>beta-thromboglobulin (BTG); assay of; Aug., 44</p> <p>bilirubin; measurement in neonates; March, 23</p> <p>biotin-avidin system; in DNA-probe assays in microbiology; April 25</p> <p>blastomycosis; serodiagnosis of; March, 46</p> <p>blood; clotting of; proteins C and S in; Dec., 29; role of prostaglandins and thromboxin in; Sept., 39</p> <p>blood grouping and typing; automated system for; Nov., 43</p> <p>blood smear; abnormalities in; as indicator of disease; Oct., 29</p> <p>blood; specimen handling; for accurate results; Aug., 60</p> <p>bone; osteoid; in multiple myeloma; Jan., 52</p> <p>as source of alkaline phosphatase; May, 56</p> <p><b>C</b></p> <p>C-reactive protein; as source of interference in tests for <i>Aspergillus</i> infection; March, 56</p> <p>CO<sub>2</sub>; loss from blood specimens during collection and handling; Aug., 60</p> <p>calcium; serum total; in multiple myeloma; Jan., 54</p> <p>cancer; breast and endometrial; hormone-receptor assays in; July, 35</p> <p>immunohistologic diagnosis of; May, 38</p> <p><i>Candida albicans</i>; antigens as bases for immunoassays; March, 54</p> <p><i>Candida</i> spp.; rapid microscopic identification of in clinical specimens; July, 66</p> <p>candidiasis; diagnostic tests for; March, 53</p> <p>cannabinoids; tests for; forensic and legal aspects; Jan., 32</p> <p>carcinoembryonic antigen (CEA); in colorectal carcinoma; an evaluation; Nov., 27</p>

compared to human milk-fat globulin antigen as a marker of breast carcinoma; May, 46

carcinoma; spindle-cell; immunohistochemical recognition of; May, 42

spindle-cell; immunohistologic recognition of; May, 42

cellofluor ( $\text{Na}^+$ -4,4'-bis-4-anilino-bis-diethylamino-5-triazin-2-ylamino-2,2'-stilbene disulfonate); in fluorescence-microscopic identification of fungi; July, 66

centrifugal analyzer; in phenytoin assay; Sept., 54

*Changing Patterns of Infectious Disease* (Bergquist); (Book review); July, 69

cholesterol; in heart disease; July, 9

chromatography; column; for separating creatine kinase (CK) isoenzymes; Jan., 46

gas-liquid; as confirmatory method in cannabinoid testing; Jan., 38

gas-liquid; for ethanol in blood of automobile drivers; June, 21

gas-liquid; with mass spectroscopy; for arabinitol in *Candida* infections; March, 59

gas-liquid; for steroids in athletics; Aug., 58

high-performance liquid (HPLC); in assay for hormone receptors in breast and endometrial cancer; July, 44

high-performance liquid (HPLC); in drug monitoring and toxicology; with microbore columns; Oct., 59

high-performance liquid (HPLC); in assay of phenytoin; Sept., 54

high-performance liquid (HPLC); for steroids in athletics; Aug., 58

C1q-based binding assays for circulating immune complexes; Dec., 36

coccidioidomycosis; serodiagnosis of; March, 46

codocytes (target cells); as disease indicators in blood smear; Oct., 31

colon; cancer of; carcinoembryonic antigen (CEA) as a marker of; Nov., 27

*A Color Atlas and Instruction Manual of Peripheral Blood Cell Morphology* (O'Connor); (Book review); July, 69

complexes; circulating immune; assays for; Dec., 35

computer; in automated blood grouping and typing system; Nov., 44

computers; in laboratory; costs and benefits of the TRILAB system; Nov., 58

in medical diagnosis; Nov., 15

Consensus Development Conference on Lowering Blood Cholesterol, 1984; July, 10

costs; hospital laboratory; June, 35

creatine kinase (CK)

MB isoenzyme; comparison of assay methods; Jan., 44

cryptococcosis; immunologic diagnosis of; March, 35

*Cryptococcus neoformans*; immunologic identification methods for; March, 35

cyclosporine; clinical applications and assays; Jan., 29

ciproterone; illegal use in athletics; Aug., 56

## D

dacrocytes; as disease indicators in blood smear; Oct., 32

data-base; protein; for use in two-dimensional electrophoresis; Oct., 55

$\Delta^9$ -tetrahydrocannabinol; as the active metabolite of marijuana; Jan., 37

$\delta$ -aminolevulinate synthetase ( $\delta$ -ALA); in biosynthesis of heme; July, 54

densitometry; computerized; in two-dimensional electrophoresis; Oct., 52

deoxyribonucleic acid (DNA); recombinant; applications in clinical microbiology; Feb., 21

diabetes mellitus; beta-thromboglobulin levels in; Aug., 47

diagnosis-related-group (DRG) system; as factor forcing the evaluation of laboratory programs; Dec., 42

and future of medical technology; June, 50

dilution; as a factor in the accuracy of urine-protein measurement; Sept., 61

direct fluorescent antibody staining (DFA); for *Candida* and *Aspergillus* in tissue specimens; March, 56

disease; fungal; immunoserologic diagnosis of; March, 31

thromboembolic; platelet-release proteins in; Aug., 43

thrombotic; deficiency of protein C in; Dec., 31

diseases; glycogen-storage; as sources of neonatal and pediatric hypoglycemia; Dec., 16

diuretics; illegal use in athletics; Aug., 56

Down syndrome; alpha-fetoprotein as a marker of; Sept., 24

drenacytes (sickle cells); as disease indicators in blood smear; Oct., 31

driving under the influence of alcohol (DUI) legislation; and ethanol testing; April 15

drugs; illegitimate use in athletics; Aug., 53

nonsteroidal anti-inflammatory; as inhibitors of prostaglandin and thromboxane formation; Sept., 47

Dukes staging system for colon cancer; correlations with, and relationship to, carcinoembryonic antigen (CEA) concentrations; Nov., 30

**E**

economics of hospital laboratories; June, 31

laboratory; and future of medical technology; June, 47

electrocardiographic abnormalities; in viral myocarditis; Dec., 23

electrophoresis; agarose-gel; for separating proteins in the cerebrospinal fluid in multiple sclerosis; Oct., 43

in assay of creatine kinase-MB; Jan., 46

polyacrylamide-gel (PAGE); in assay for acetylcholinesterase as a marker of fetal neural-tube defects; Sept., 29

in separating alkaline phosphatase isoenzymes; May, 57, 62

two-dimensional; recent applications; Oct., 49

endonuclease enzymes; in DNA-probe assays in microbiology; April 22

enzyme-linked immunoassay (ELISA); for cell-wall mannan of *Candida albicans*; March, 54

enzyme-multiplied immunoassay technique (EMIT); for cannabinoids in urine; Jan., 38

epilepsy; phenytoin monitoring in; Sept., 49

*Escherichia coli*; DNA-probe assay for OmpB gene; April 25

estrogen; receptors in breast cancer; assays for; July, 35

ethanol; breath testing for; in motor vehicle operators; June, 21

as an intoxicant during driving; April, 15; June, 21

expert systems; in computerized medical diagnosis; Nov., 16

## F

false-positive results; in latex agglutination tests for cryptococcosis; March, 39

fluorescent antibody stains; as compared with immunoperoxidase stains; Aug., 32

fluorescent immunoassay; for phenytoin; Sept., 50

fungi; rapid microscopic identification of in clinical specimens; July, 63

## G

gastroschisis; alpha-fetoprotein as a marker of; Sept., 29

glucose; blood; enzymatic degradation of in stored specimens; Aug., 61

## H

heart disease; cholesterol as a risk factor in; July, 9

HELP system; in computerized medical care; Nov., 18  
hematocrit; as a factor affecting blood viscosity in newborns; Aug., 27  
hematofluorometer; in assaying protoporphyrin in the diagnosis of iron depletion; July, 55  
hemoglobinopathies; identified by red-cell abnormalities in the blood smear; Oct., 31  
herpes simplex virus; types I and II; biotin-avidin-amplified immunoassays for; June, 53  
high-density lipoprotein (HDL) cholesterol; as a selective predictor of risk for coronary heart disease (CHD); July, 10  
high-performance liquid chromatography (HPLC); in assay of hormone receptors in breast and endometrial cancer; July, 44  
histoplasmosis; serodiagnosis of; March, 46  
hyperbilirubinemia; in neonates; laboratory aspects; March, 23  
hypochromic red cells; as disease indicators; Oct., 30  
hypoglycemia; neonatal and pediatric; sources of; Dec., 15

## I

immune complexes; assays for; use and limitations; Dec., 35  
immunoassay; biotin-avidin-amplified; for herpes simplex virus types I and II; June, 53  
immunofluorescent stain methods; myths and benefits; April 29  
immunoglobulin; IgG; in cerebrospinal fluid; as indicator of multiple sclerosis; Oct., 39  
IgG4; as indicator of atopic allergy; July, 20  
immunohistochemistry; in identification of hormone receptors in breast and endometrial cancer; July, 43  
inclusions; intracellular in red cells; as disease indicators; Oct., 32  
infection; nosocomial; role of hospital laboratory in monitoring for; Nov., 53  
INTERNIST system; in computerized medical diagnosis; Nov., 17  
intestine; as source of alkaline phosphatase; May, 57  
iron depletion; detection of by measurement of zinc protoporphyrin; July, 54  
ISO-DALT technique; in two-dimensional electrophoresis; Oct., 49  
isoelectric focusing; for alkaline phosphatase isoenzymes; May, 65

## K

Kaposi's sarcoma; as a manifestation of

acquired immune deficiency syndrome; May, 33  
keratins; cellular; in histologic diagnosis of cancer; May, 38  
kernicterus; from hyperbilirubinemia in neonates; March, 25  
kidney; as source of alkaline phosphatase; May, 57

## L

laboratories; hospital; projected scope and economics; June, 31  
laboratory programs; for continuing education, personnel training, and other purposes; evaluation of for cost efficiency; Dec., 42  
latex agglutination assay; for *Cryptococcus neoformans*; March, 39  
leukocyte common antigen (LCA); antibodies to; in immunohistologic diagnosis of cancer; May, 43  
lipids; vitamin E in metabolism of; June, 63  
lymphocytes; T; subpopulations in acquired immune deficiency syndrome; May, 32  
T-helper/inducer; in organ transplantation; Jan., 29

## M

macrocytes; as disease indicators in blood smear; Oct., 30  
marijuana; and other cannabinoids; laboratory tests and forensic aspects; Jan., 36  
medical technology; future of; June, 47  
trends in; Sept., 63  
medroxyprogesterone; illegal use in athletics; Aug., 56  
metabolites; fungal; as markers of fungal infection; March, 58  
microbiology; DNA-probe assays in; April, 25  
in hospital laboratory prevention and surveillance for nosocomial infection; Nov., 53  
microcytes; as disease indicators in blood smear; Oct., 30  
microplates; automated reading of; in blood grouping and typing; Nov., 44  
microscopy; of bone marrow; in multiple myeloma; Jan., 53  
in cydiagnostic urinalysis; April, 38  
immunofluorescence stain methods in; April 29  
in rapid identification of fungi in clinical specimens; July, 63  
milk-fat-globule antigen; in immunohistologic recognition of breast cancer; May, 45  
monitoring; of theophylline; with high-performance liquid chromatography using microbore columns; Oct., 60

morphology; red-cell; as disease indicator in blood smear; Oct., 29  
multiple sclerosis; laboratory diagnostic methods for; Oct., 37  
myelin basic protein; in multiple sclerosis; Oct., 37  
myeloma; multiple; osteoid bone as a manifestation of; Jan., 52  
myocarditis; viral; diagnosis of; Dec., 23

## N

Nagao isoenzyme of alkaline phosphatase; May, 60  
nosocomial infection; role of hospital laboratory in monitoring for and preventing; Nov., 53

## O

omphalocele; alpha-fetoprotein as a marker of; Sept., 29  
oral vitamin E clearance test (OVETT); June, 64  
oxygen and carbon dioxide tensions; monitoring in newborn infants; April, 41

## P

pO<sub>2</sub> and pCO<sub>2</sub>; transcutaneous monitoring of in newborn infants; April, 41  
parathyroid hormone (PTH); in multiple myeloma; Jan., 54  
peroxidase-antiperoxidase stain technique; Aug., 32  
personnel; laboratory; cost-efficiency of; April, 48  
phenytoin; automated immunoprecipitation assay for; Sept., 49  
*Pityriasis (tinea) versicolor*; rapid fluorescent microscopic identification of; July, 67  
placenta; as source of alkaline phosphatase; May, 57  
platelet disorders; congenital; Aug., 48  
platelet-factor 4 (PF4); assay of; Aug., 44  
platelet proteins; as sources of clot-related disease; Aug., 48  
platelet-release proteins; in clot-related disease; Aug., 43  
platelets; recruitment by thromboxane A<sub>2</sub> in blood clotting; Sept., 39  
*Pneumocystis carinii* pneumonia; in acquired immune deficiency syndrome; May, 33  
poikilocytosis; as an indicator of disease in blood smears; Oct., 30  
polycythemia; in newborns; Aug., 27  
Preferred Provider Organizations; as a factor influencing hospital laboratories; June, 32  
progestin; receptors in breast cancer; assays for; July, 35

programs; continuing education and other; in laboratory; evaluation of; Dec., 42  
prostaglandins; in hemostasis; Sept., 39  
protein; analysis in urine; standard dilution method for; Sep., 61  
rapid dip-stick estimation of in urine; Sep., 61  
SI00; antibodies to; in immunohistologic recognition of cancer; May, 44  
proteins; C and S; in clotting process; role and detection of; Dec., 29  
oligoclonal; in cerebrospinal fluid in multiple sclerosis; Oct., 43  
platelet-release; in myocardial and cerebrovascular disease; Aug., 43  
separation of in two-dimensional electrophoresis; Oct., 53  
protoporphyrin; zinc; in erythrocytes; in diagnosis of iron depletion; July, 53

## R

radioallergosorbent/enzyme-linked immunosorbent assay (RAST/ELISA) for IgG antibody; in allergy testing; July, 21  
radioimmunoassay; for cannabinoids in urine; Jan., 38  
for cell-wall mannans of *Candida albicans*; March, 54  
for creatine kinase-MB; Jan., 46  
for cyclosporine; Jan., 32  
for myelin basic protein in multiple sclerosis; Oct., 38  
for phenytoin; Sept., 50  
reagent strips; in cytodiagnostic urinalysis; April 36  
Regan isoenzyme of alkaline phosphatase; May, 57

## S

sarcomas; immunohistologic recognition of; May, 42  
schistocytes; as disease indicators in blood smear; Oct., 32  
scintigraphy; in diagnosis of viral myocarditis; Dec., 24  
"second-look" operations for colon cancer; as suggested by carcinoembryonic antigen (CEA) concentrations; Nov., 33  
smear; blood; red cells as disease indicators in; Oct., 29  
spectrometry, mass; in cannabinoid testing; Jan., 38  
spina bifida; alpha-fetoprotein as a marker of; Sept., 23  
stain; Papanicolaou; in cytodiagnostic urinalysis; April, 36  
periodic acid-Schiff; for fungi in clinical specimens; July, 63  
Romanowsky-type; for identifying red cells as disease indicators; Oct., 29  
stains; immunohistochemical; in diag-

nosis of cancer; May, 39  
immunoperoxidase; methods and uses; Aug., 31  
silver; densitometric reading of in electrophoresis; Oct., 52  
steroids; anabolic; illegal use in athletics; Aug., 55  
stomatocytes; as disease indicators in blood smear; Oct., 31

## T

technology; medical; future of; June, 47  
trends in; Sept., 63  
teleconferencing; as a means for continuing education in laboratories; May, 69  
television; closed-circuit; in laboratory teleconferencing; May, 75  
test; oral vitamin E tolerance (OVETT); June, 64

tube precipitin; for antibodies to *Coccidioides immitis*; March, 51  
testing; serologic; in diagnosis of viral myocarditis; Dec., 24  
tests; chemistry; costs of in hospital laboratories; June, 35  
volume of in hospital laboratories; June, 32  
theophylline; monitoring of; with high-performance liquid chromatography (HPLC) using microbore columns; Oct., 61  
thromboxane A<sub>2</sub>; in hemostasis; Sept., 39  
thymoma; immunohistochemical recognition of; May, 42  
tissue plasminogen activator (TPA); and protein in blood-clot lysis; Dec., 30  
transcutaneous pO<sub>2</sub> and pCO<sub>2</sub> monitoring; in newborns; April, 41  
transient ischemic attack (TIA); role of platelet-release proteins in; Aug., 45  
transplantation; cyclosporine in; Jan., 29  
TRILAB computer system; costs and benefits of; Nov., 58  
*Tropical Microbiology* (Montefiore, Alausa, and Tomori); (Book review); July, 69

## U

units; different systems of; in reporting results of alkaline phosphatase assays; May, 56  
urine; analysis of protein in; standard dilution method for; Sept., 61  
urine culture; frequency of; and detection of hospital-based infection; Nov., 54  
urinalysis; cytodiagnostic; method and applications; April, 36

## V

virus; Epstein-Barr and cytomegalovirus; in cases of acquired immune deficiency syndrome (AIDS); May, 34  
human T-cell lymphotropic type III;

as agent of acquired immune deficiency syndrome (AIDS); May, 32  
viruses; herpes simplex types I and II; detection with biotin-avidin immunoassays; June, 53

herpes type I and II; DNA-probe assays for; April, 22  
as sources of myocarditis; Dec., 23  
viscosity; blood; in neonatal polycythemia; Aug., 27  
vitamin E; deficiency of; tests for; June, 57  
use by athletes; Aug., 56  
vitamin K; in synthesis of Factor X; Dec., 29

## Z

zinc protoporphyrin; erythrocyte; in diagnosis of iron depletion; July, 53

## Professional

### Dates

#### FEBRUARY

**5-7 Continuing Medical Education Conference on Clinical Laboratory Molecular Analyses: Emerging Technology and Future Trends** in San Diego, CA. Contact: Bonny Mower, Department of Academic Affairs, Box 400S, Scripps Clinic and Research Foundation, 10666 N. Torrey Pines Road, La Jolla, CA 92037; (619) 457-8556.

**25-March 1 Workshop Week for Medical Technologists** in Orlando, FL. Contact: Ann Walters, Marketing Manager, American Society of Clinical Pathologists, 2100 West Harrison Street, Chicago, IL 60612; (312) 738-4874.

#### MARCH

**10-14 Hematology Morphology Workshop: White Blood Cell Morphology** in Rochester, NY. Contact: Jean A. Shafer, Program Director, Hematology Unit, Department of Medicine, Box 610, University of Rochester School of Medicine, 601 Elmwood Avenue, Rochester, NY 14642; (716) 275-2882.
